

Lab 3 -(Tasks 1-7)

Task 1: First view + URL mapping (core urls.py)

A) views.py (index)

```
from django.http import HttpResponse

def index(request):
```

```
    return HttpResponse("Hello, world!")
```

B) project urls.py

```
from django.contrib import admin

from django.urls import path

from apps.bookmodule import views

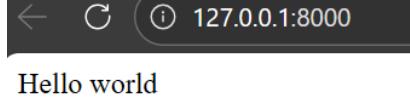

urlpatterns = [
```

```
    path('admin/', admin.site.urls),
```

```
    path('', views.index),]
```

- http://127.0.0.1:8000/ → shows: Hello, world!

Screenshots:

Task 2: GET parameter (name)

views.py (index with GET parameter)

```
from django.http import HttpResponse

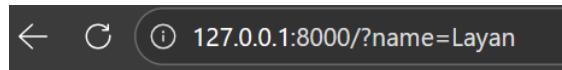

def index(request):
```

```
    name = request.GET.get("name") or "world"
```

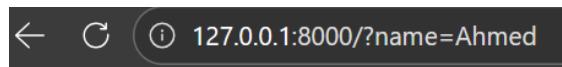

```
    return HttpResponse("Hello " + name)
```

- http://127.0.0.1:8000/?name=Layan → Hello, Layan
- http://127.0.0.1:8000/?name=Ahmed → Hello, Ahmed

Screenshots :

Hello Layan

Hello Ahmed

Task 3: Second view + URL path parameter (index2/<int:val1>/)

views.py (index2)

```
from django.http import HttpResponse

def index2(request, val1=0):
    return HttpResponse("value1 = " + str(val1))
```

urls mapping for index2

```
path('index2/<int:val1>', views.index2),
```

- <http://127.0.0.1:8000/index2/5/> → value1 = 5
- <http://127.0.0.1:8000/index2/100/> → value1 = 100

Screenshots:

value1 = 5

value1 = 100

Task 4: Create HTML template + render()

index.html (Task 4 content)

```
<h1>Hello from a template!</h1>
```

views.py (index using render)

```
def task4(request):  
  
    return render(request, "bookmodule/index.html")
```

Screenshots:

Hello from a template!

Task 5: Render variables in template (context)

index.html (Task 5)

```
<h1>Hello from {{ name }}!</h1>
```

views.py (index with context)

```
def index(request):  
  
    name = request.GET.get("name") or "world"  
  
    return render(request, "bookmodule/index.html", {"name": name})
```

Screenshots:

Hello from Layan!

Task 6: App-level urls.py + include() in project urls.py

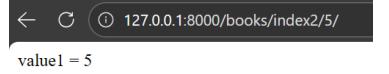

apps/bookmodule/urls.py

```
urlpatterns = [
    path("", views.index),
    path("index2/<int:val1>", views.index2),
]
```

libraryproject/urls.py (include)

```
urlpatterns = [
    path('admin/', admin.site.urls),
    path('books/', include('apps.bookmodule.urls')),
]
```

Screenshots to include:

Task 7: Book details page (URL + view + HTML)

views.py (viewbook)

```
from django.shortcuts import render
```

```
def viewbook(request, bookId):
```

```
    book1 = {'id': 123, 'title': 'Continuous Delivery', 'author': 'J. Humble and D. Farley'}
```

```
    book2 = {'id': 456, 'title': 'Secrets of Reverse Engineering', 'author': 'E. Eilam'}
```

```
    targetBook = None
```

```
    if book1['id'] == bookId:
```

```
        targetBook = book1
```

```

if book2['id'] == bookId:
    targetBook = book2
context = {'book': targetBook}
return render(request, 'bookmodule/show.html', context)

apps/bookmodule/urls.py
path('<int:bookId>', views.viewbook),

```

show.html

```

<h4>ID: {{ book.id }}</h4>
<h4>Title: {{ book.title }}</h4>
<h4>Authors</h4>
<p>{{ book.author }}</p>
<h4>Description</h4>
<p>Description here</p>

```

Screenshots:

The screenshot shows a browser window with the URL `127.0.0.1:8000/books/123` in the address bar. The page content displays the following information:

ID: 123

Title: Continuous Delivery

Authors

J. Humble and D. Farley
